

Join Us in Celebrating IH Physician Quality Improvement Cohort 2!

Monday, June 14, 2021

9:00 a.m. – 12:00 p.m.

Virtual Event – Register here (required)

The IH PQI Cohort 2 graduating class of physicians and their partners will be sharing presentations on lessons learned, experiences had and projects developed.

Interior Health's PQI initiative is the only one in the province that engages operational/clinical dyad partners and invites them to participate in the education sessions along side their physician partners. The result is a very collaborative and enriched learning environment, evidenced by the projects developed and experiences shared.

We are proud that the focus of the quality improvement projects chosen by the physicians are reflective of the geographic and clinical diversity of Interior Health. It has been quite a year and our participants have had to pivot and adapt; therefore, some projects may look different and some may have been put on hold. Learn how graduates applied their QI skillset in support of the pandemic response.

Invite a friend!

As this is a virtual event, we encourage you to forward this invite to anyone who may be interested in attending.

Visit the IH PQI YouTube Library:
